Batuz
Societe Imaginaire
Altzella
Nossen, Sachsen

Dear Batuz:

Thanks to you, early next month four students of the Massachusetts Institute of Technology will arrive at Altzella and remain most of the month of June. They will work on a collective project and, we expect, discover new projects through the associations they develop in your circle.

Now that I have come to know you and the Societe Imaginaire better through our meetings at Cadenabbia, I anticipate that still other of our faculty could find their association with the Societe to be fruitful. It would then be possible for our students of future years to find special opportunities for their intellectual and artistic growth in the environment of Altzella.

Sincerely yours,

Stanford Anderson,
Head, Department of Architecture
